

ENGINEERING LETTERS

The New York Blower Company • 7660 Quincy Street, Willowbrook, Illinois 60521 -5530

NUMBER

SUBJECT

1	System Calculation
2	Fan Laws and System Curves
3	Understanding Fan Performance Curves
4	Temperature and Altitude Affect Fan Selection
5	Fan Performance - The System Effect
6	Increasing Fan Performance
7	Field Testing of Fan Systems
8	Proper Selection of Pressure Blowers
9	Pneumatic Conveying
10	Fans and Blowers for Combustion Process
11	Selection Criteria for Fan Dampers
12	Fan Acoustics
13	Fan Balance and Vibration
14	Stainless Steel Specifications for Fan Equipment
15	Practical Limits of Spark-Resistant Construction
16	Corrosion-Resistant Coatings for Fan Equipment
17	Coating Surface Preparation Specifications
18	Corrosion Resistance of FRP Fans
19	Design and Construction of nyb FRP Fans
20	Accessories and Construction Modifications for FRP Fans
21	Surface Veil for FRP Fans
22	Integral Motors for Centrifugal Fans
23	Electric Motor Codes and Standards
24	Fundamentals of Steam
25	Industrial Steam Heating Systems
E	Miscellaneous Engineering Data
