FRP GP Fume Exhausters  
FRP Fume Exhausters  
FRP Radial Fume Exhausters  
FRP Pressure Blowers

The paints and coatings shown below are those stocked by nyb. Most fans can be coated with any of these finishes without addition to the standard delivery promise. Orders for fans with an add for one of these coatings should use the complete description shown including the nyb coating code [CC].

#### NOTES:

1. The urethane coatings shown below are applied over one coat of alkyd primer as standard. All other coatings are applied direct-to-metal.
2. Most fans operating at 301°F and above are coated with high-temperature gray enamel. (Except where otherwise noted).
3. Alloy constructed airstream parts are usually shipped uncoated. Exterior portions of these parts are usually shipped coated.

CC93 - nyb Green Enamel

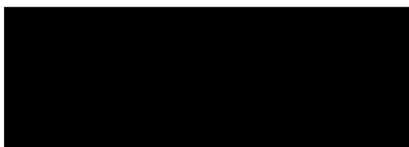

CC92 - High Temp Gray Enamel

CC88 - Safety Yellow Enamel  
RAL 1023

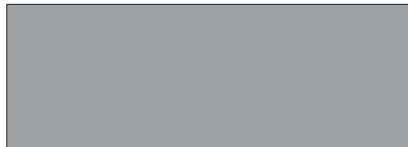

CC97 - Safety Orange Enamel  
RAL 2009
